SOFTWARE ENGINEER

SRE | DevOps | CI/CD | Microsoft Azure | Linux | AI

Guided by the premise of structuring complexity with precision, I engineer resilient, AI-powered architectures. With proven DevOps experience, I channel mathematical rigor into scalable solutions, transmuting abstract reasoning into enterprise value—a methodology honored with 2nd place in the Academic Challenge (Asteria).

EDUCATION

FIAP – Faculdade de Informática e Administração Paulista

Bachelor of Science in Software Engineering, Graduation: 12/2027

ACADEMIC EXPERIENCE

SellOut EasyTrack – FIAP (2025)

- **Architectural Conception & Development:** Engineered *SellOut EasyTrack*, a sophisticated sales management application deliberately crafted to resolve the complex corporate paradigms presented by Asteria.
- **Collaborative Synergy:** Orchestrated technical efforts and synergized within the *CodeSquad* ensemble, fostering an environment of continuous innovation to drive the software's lifecycle from its genesis to deployment.
- **Technical Implementation:** Utilized a robust technological stack to construct an intuitive, highly responsive, and efficient system architecture tailored for optimal commercial data management.
- **Crowning Achievement (Result):** Conquered the distinguished **2nd Place** in the highly competitive 2025 FIAP Challenge, standing as a monumental testament to the project's technical excellence, strategic vision, and the team's unwavering dedication.

WORK EXPERIENCE

Vivo Telefonica - São Paulo, SP

08/2024 - 12/2025

Maintained and optimized *Azure CI/CD pipelines* to ensure agile, automated, and dependable software delivery.

- **Collaborated** cross-functionally to troubleshoot and resolve pipeline bottlenecks in *Azure DevOps*, eradicating downtime and accelerating lead time. Leveraged *Infrastructure as Code (IaC)* via *Terraform*, containerization with *Docker*, and workload

management across *Kubernetes* and *Linux* environments, strategically aligning *SLIs*, *SLOs* and *SLAs* to elevate service reliability.

CORE COMPETENCIES

- **Software Engineering & Architecture:** Proficiency in building robust, scalable applications utilizing Java, C#, Python, and JavaScript.
- **DevOps & Continuous Delivery:** Hands-on expertise in Azure DevOps, orchestrating CI/CD pipelines, and automating deployment workflows.
- **Database Management:** Advanced command of SQL and Oracle Database, including complex relational modeling and secure data integration.
- **Data Analytics & Visualization:** Adept at leveraging R, Tableau, and Power BI to transform intricate datasets into clear, actionable insights.
- **Analytical Problem Solving:** Sharp strategic acumen applied to troubleshooting complex system bottlenecks and architecting efficient solutions.
- **Disciplined Resilience & Team Synergy:** A steadfast, goal-oriented work ethic combined with a proven capacity to thrive and collaborate within high-performance engineering squads.
